1 INTRODUCTION

This manual describes the main features of the tool SYGAFE V2.05 It's dedicated to people who want to generate an acceptance book dedicated to customer.

2 OVERVIEW

SYGAFE is a tool for generating a catalog of acceptance sheets. It is dedicated to people in charge of customer acceptance books. The catalog generated by SYGAFE includes the following items:

- List of acceptance sheets to be used during acceptance tests (acceptance book dedicated to a customer).
- Acceptance sheets relative to a product chosen by TPM and describing the tests to be performed.
- Acceptance form to record the test results.

The aim of SYGAFE is to make an acceptance book for a customer and an acceptance report. SYGAFE is composed of 3 main features:

- Acceptance sheets access: This feature is used after selecting a project.
- Acceptance book generation: It is obtained from a generic acceptance book. Data from unused acceptance sheets have to be deleted.
- Acceptance reports generation: This is the last operation to do. This acceptance report will be automatically generated. The user has to manage the both documents (acceptance book, acceptance report) and to store them on GEDI.

There is no possibility to edit the content of the acceptance sheet. The only way for that is to access directly to Gedi and to obtain the html or pdf version.

3 SYGAFE ACCESS

You access SYGAFE with your PC and a browser. The URL is: http://webdt.ln.cit.alcatel.fr:8282/sygafe/CIL/formulaire.html.

Then, you enter your Corporate login and password in dialog box as below:

Figure 1: SYGAFE Welcome Window

After entering login and password you obtain this new dialog box:

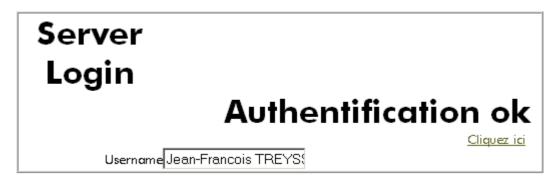

Figure 2: Authentication window

You are now able to access SYGAFE tool by clicking in the right down part of this window. For exiting SYGAFE you have to click on "Disconnect".

4 MAIN MENU

After entering your login and password you access to the main menu. Default menu is in English. Click on the French flag (top left) to select English menu. You can select one of the 3 possibilities:

- Generate a new acceptance book extracted from a generic one.
- Create a new edition of an acceptance book already existing.
- Realize a comparison between two acceptance books already existing.

The main menu window is as below:

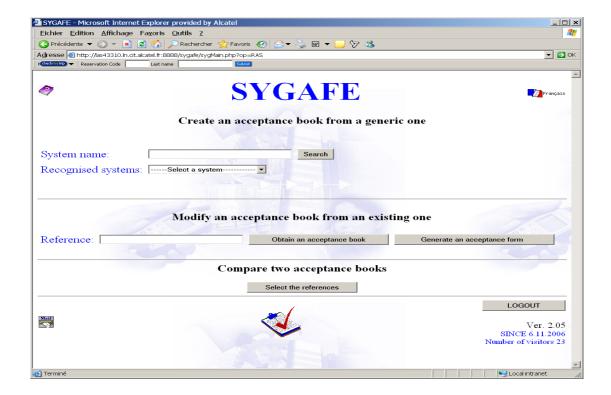

Figure 3:SYGAFE MAIN window

5 GENERATE A NEW ACCEPTANCE BOOK (FROM A GENERIC)

If you select the first possibility you have to select a system, a project and the language as in the window below:

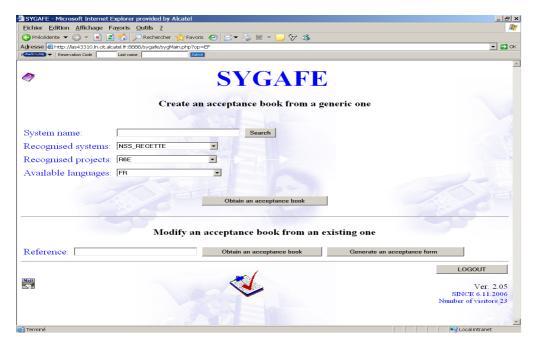

Figure 4: Create an acceptance book from a generic one

Then you click on « Obtain an acceptance book » and you obtain the list of acceptance sheets.

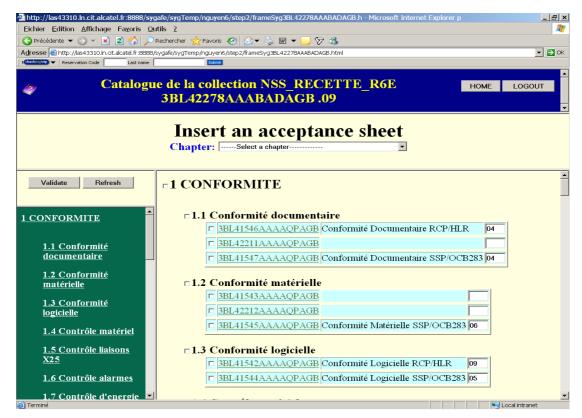

Figure 5: Insert an acceptance sheet

On the left part of the window you have the chapters of the acceptance book. All chapters and acceptance sheets are unselected by default. You can select a complete chapter or some acceptance sheets of a chapter. When scrolling down the window you obtain at the end a synthesis of the acceptance book as in the window below:

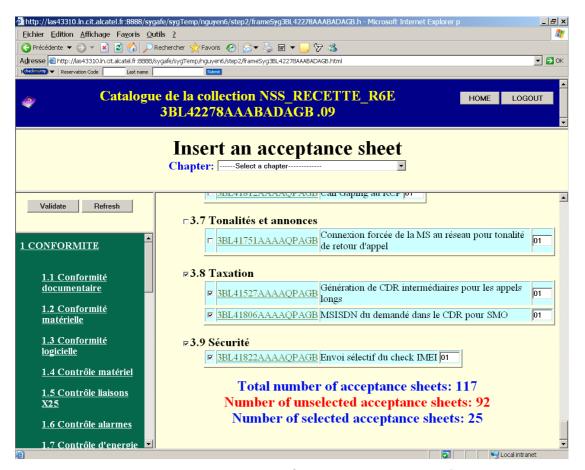

Figure 6: Counter of insert an acceptance sheet

On this snapshot of the 25 acceptance sheets are selected (total number, number of sheets not selected, number of selected sheets).

You also may insert a new acceptance sheet (top of the window). You select the chapter and subchapter where you want to insert the new acceptance sheet. Then you enter the reference of the acceptance sheet available on GEDI.

Figure 7: Insert an acceptance sheet selection chapter and subchapter

It is possible to modify the edition of an acceptance sheet. You may choose an edition value smaller than the one in the generic acceptance book. When you have finished your modifications you click on "Validate" and you obtain the window as below:

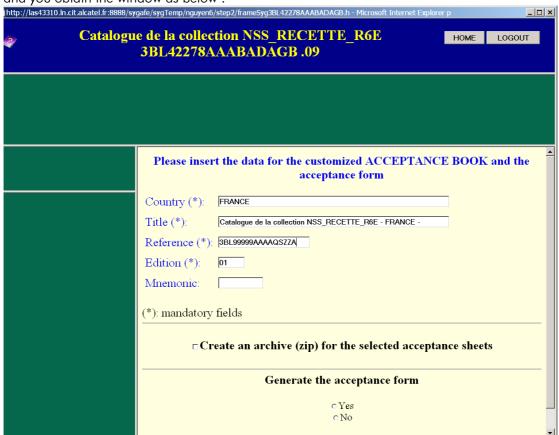

Figure 8: Form to create the customized Acceptance book

You have to fill-in the country, title and reference of the acceptance book. The end of customized acceptance book is **QSZZA**

The option create a zip archive is available up to 60 selected sheets.

The user will take care to create as much archive as necessary if the number of selected sheets is greater than this limitation. An optimized method will be implemented in the next version.

Figure 9: more information for the acceptance book and the acceptance form

Fill in the mnemonic field (optional)

If the option button « generate acceptance form » is set, fill in the information for the acceptance form

Figure 10: more information for the acceptance form

Click on Validate button, the window of downloading generated file will display:

Figure 11: Download generated file

Click on GEDI consignation to save the acceptance book under GEDI.

The caption "The acceptance book is consigned in GEDI" replaces the button when is done

6 GENERATE ACCEPTANCE FORM

In the main menu window you select the second choice. You enter the reference of the acceptance book and click on "Generate an acceptance form". You obtain a window as below:

Figure 12:Generate the acceptance form

Click on validate

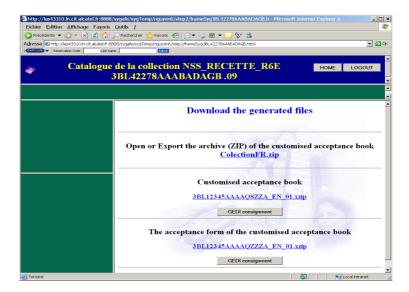

Figure 13: Download the acceptance form

When you click on the reference of the form you edit on the screen the form if you have EPIC installed on your computer.

Click on "GEDI consignment" button to save the document under GEDI.

The caption "The acceptance form is consigned in GEDI" replaces the button when is done

7 EXPORT AN ARCHIVE (ZIP) FOR THE SELECTED ACCEPTANCE SHEETS

From the Download generated file, when you click on the archive link you open the download form: screen the form.

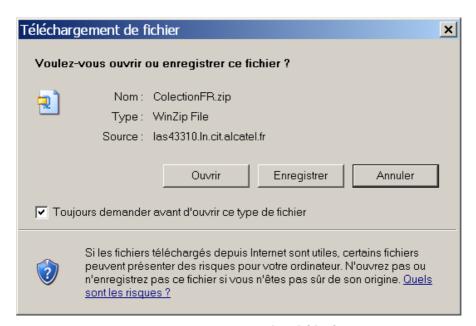

Figure 14: Download file form

Click on "OPEN" button to open the archive directly.

Click on "SAVE" button to save the archive into you computer. You will then select the location to export the file.

Click on "CANCEL" button to do anything

Using a French interface of Operating System, the button are called "OUVRIR", "ENREGISTRER" ,

"ANNULER" as displayed in the figure 15

8 MODIFY AN ACCEPTANCE BOOK EXTRACTED FROM AN EXISTING ONE

In the main menu window you select the second possibility. You select the reference of the existing acceptance book and click on "Obtain an acceptance book" and you obtain the window below:

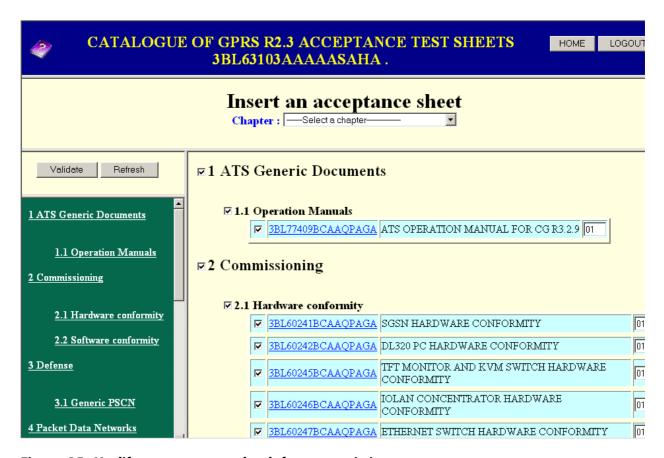

Figure 15: Modify an acceptance book from an existing one

All the chapters and acceptance sheets are selected by default. You may choose a complete chapter or some acceptance sheets. When scrolling down the window you find at the bottom the synthesis of the acceptance book (total number of sheets, number of sheets not selected, number of selected sheets). You also may insert a new acceptance sheet. You select the chapter and subchapter where you want to insert the sheet. Then you enter the reference of the acceptance sheet available on GEDI. You also may modify the edition value of the acceptance sheets.

9 COMPARISON BETWEEN TWO EXISTING ACCEPTANCE BOOK

The user will give the references of acceptance book to be compared. The click on the button Compare runs the process.

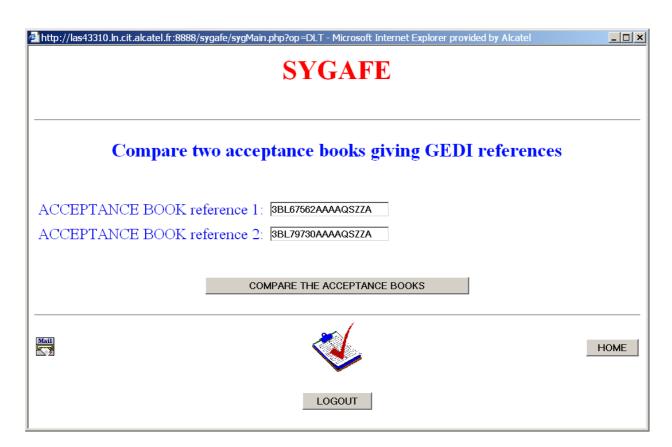

Figure 16: Compare two acceptance books giving GEDI references

The result displayed on the screen shows the following cases:

- Existing sheet with the same reference in both acceptance book
- Existing sheet with the same reference in both acceptance book with different edition
- Existing sheet in the first acceptance book and not in the second one
- Existing sheet in the second acceptance book and not in the first one

The cases are underline in different Color:
